4

Some Questions

- Please stand up if you are an LCIA practitioner.
- Please remain standing if you conduct LCA across more than one impact category.
- Please remain standing if your work results in recommendations that affect the public or business.
- Please sit down if the LCIA's that you do always result in **ALL** impacts favoring one outcome.

7

Some More Questions

- Please stand up if you are an LCIA practitioner.
- Please remain standing if you conduct LCA across more than one impact category.
- Please remain standing if your work results in recommendations that affect the public or business.
- Please sit down if the LCIA's that you do always result in **ALL** impacts favoring one outcome.

This workshop is for you

8

So If Some of Us Need Weightings where should we get them?

- **Three basic methods – many variants:**
 - **Distance-to-target – Political targets as a basis for weighting**
 - **Externality costs – Market methods to determine peoples' priorities/preferences**
 - **Panel methods – Asking stakeholders**

9

Looking for Consistency and Representativeness

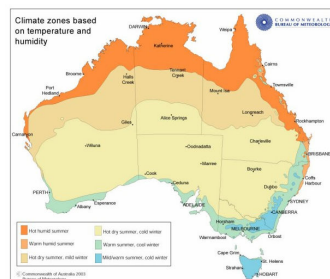

- **Three basic methods – many variants:**
 - **Distance-to-target – Political targets as a basis for weighting**
Consistency x Representative ✓
 - **Externality costs – Market methods to determine peoples' priorities/preferences**
Consistency x Representative ✓
 - **Panel methods – Asking stakeholders**
Consistency ✓ Representative x

10

Weightings Work BPIC/ICIP Project

11

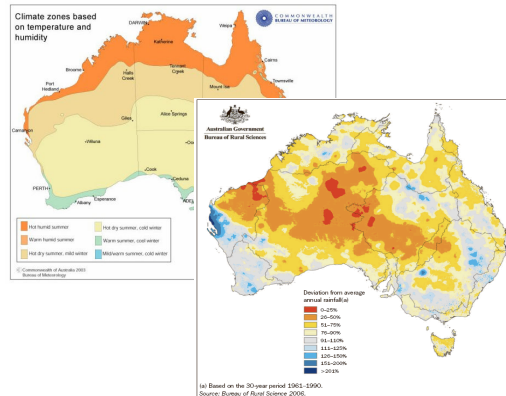

Australia – BIG– Different Pressures & Priorities in Different Regions

Different
Climate Zones

12

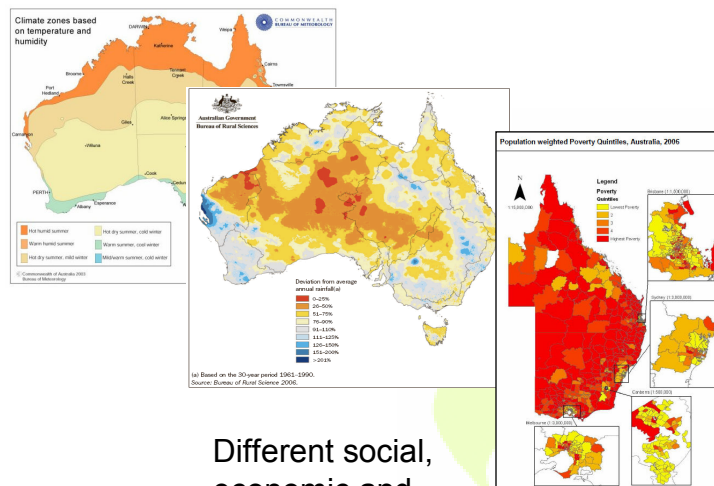

Australia – BIG– Different Pressures & Priorities in Different Regions

Different levels of water stress

13

Australia – BIG– Different Pressures & Priorities in Different Regions

Different social, economic and cultural pressures

14

15

Who we asked/tried to ask:

Government Policymakers/Regulators (Federal and State)
Construction Professionals - Builders/Designers/Surveyors
Local Authorities
Materials Producers/Manufacturers
Developers/Investors
Activists and Lobbyists
Academics

Homebuyers
Consumer Groups
School Students
Retirees
Agricultural Workers
Parks and Forestry
Community Groups
Teachers and Parent Groups

16

Locations

Rank	Statistical Division/District	State	June 2008 Estimated Resident Population[2]	Climate Zone
13	Townsville	Queensland	162,730	1
14	Cairns	Queensland	142,001	1
16	Darwin	Northern Territory	120,652	1
	Alice Springs			3
3	Brisbane	Queensland	1,945,639	2
6	Gold Coast-Tweed	Queensland/New South Wales	558,888	2
10	Sunshine Coast	Queensland	237,562	2
21	Mackay	Queensland	81,148	2
25	Rockhampton	Queensland	75,497	2
26	Bundaberg	Queensland	66,176	2
29	Hervey Bay	Queensland	56,165	2
30	Coffs Harbour	New South Wales	51,538	2
32	Gladstone	Queensland	48,796	2
18	Albury-Wodonga	New South Wales/Victoria	102,894	4
28	Wagga Wagga	New South Wales	56,911	4
31	Mildura	Victoria	49,280	4
33	Shepparton	Victoria	47,710	4
34	Tamworth	New South Wales	45,615	4
37	Dubbo	New South Wales	36,653	4
43	Kalgoorlie/Boulder	Western Australia	31,509	4

Weighting of Internal Environment Issues

Statistical Validity

- **Not claiming statistical representation – 217 people across 11 locations do not represent 14M**
- **Small samples – only 26 out of 411 results showed variance beyond that expected at a 1% confidence limit**

34

Why We Need Weighting

Why we Need Weighting

- To assess and ecolabel materials and products
- To assess and rate buildings for their environmental impacts
 - Voluntary tools – Green Star, NABERS...
 - Sustainability Regulation – BASIX (NSW), Building Code of Australia
- To prioritise environmental policy and expenditure
- To ensure that assessments are appropriate to location (climate and local priorities)

The Weighting Sheets - Demographic

Occupation				
Sex	M/F			
Organisation				
Community groups that you are involved in:				
Are you planning to purchase a house in the next 10 months?	Y/N			
	Please circle			
Annual Income (Optional)	Under \$30k	\$30 - 60k	\$60 - 90k	\$90 - 120k
Age	19 or under	20 - 34	35 - 49	50 - 64

41

The Weighting Sheets – Hierarchy of Impacts

Environmental Issues	Weight
1.1 Global Issues	
Global Warming	
Air Pollution	
Acid Rain	
Ozone Hole	
Marine Pollution	
Ecological Impact	
Terrestrial ecosystem	
Bioaccumulative toxics	
Tropical forest clearing	
Resource depletion	
Fossil Fuel Depletion	
Mineral Resource Depletion	
1.2 Local & Site Issues	
Toxicity	
Human Toxics	
Ecotoxics	
Pesticides	
Land Productivity	
Contaminated Land	
Soil Degradation / Erosion	
Soil salinisation	
Loss of agricultural Land	
Air pollution	
Acid particulates	
Particulates	
Photochemical smog	
Water Pollution	
Sediment	
Eutrophication (excess nutrients)	
Urbanisation	
Heat Island - Cities	
Noise & Vibration	
Light Pollution	
Open Space	
Habitat Loss	
Local Resources	
Water Scarcity	
Landfill Capacity Scarcity	
1.3 Internal Environment	
Health	
Indoor Air Quality	
Legionnaires Disease	
Dust Mite	
Comfort	
Heating & Cooling	
Humidity	
Ventilation	
Internal Noise	
Odour	
Access to sunlight	
Visual
